HOW TO REIMAGINE AND BUILD WORKFLOWS THAT WEREN'T POSSIBLE BEFORE

LIZA ADAMS

Founder, AI Advisor & GTM Strategist

GrowthPath Partners

Faster is the Floor. Different is Where Growth Happens.

Faster	*AI speeds up the work you're already doing.*
Better	*AI raises the quality of what you produce.*
Different	*AI helps you do work that wasn't possible before*

Start by asking:

- *"What was hard to do manually, slow, or expensive for all-humans teams to do at scale?"*
- *"Is this hard or just historically hard?"*

Hard, or Just Historically Hard?

Was it hard to do manually, time consuming, and expensive to do at scale for an all-human team?

1. Watch every competitor and market source, every week

   so you know if your positioning or product-market fit is slipping

2. Pull what every team knows about a customer into one view

   so customers feel like one company, not five

3. Read every call, ticket, and review next to market news

   so you see what's actually changing your position, not just your own numbers

4. Test a message on every buyer persona before you ship it

   so you know how it'll land before you spend money on it

What a Workflow Is Made Of

You work inside one project. Three things you set up once, one thing you bring each run.

SET UP ONCE

EACH RUN

1 CONTEXT

What the AI needs to know every time. Background and reference materials

EXAMPLES

Brand guide, personas, product info, proof points, samples of what good looks like, templates

2 SKILLS

A technique the AI applies, like a quality check. "How to"

EXAMPLES

How to analyze, how to create assets, how to apply quality standards

3 INSTRUCTIONS

The order of steps, the workflow experience

EXAMPLES

Steps in order, the output format, how AI should engage with you, interaction tone

4 INPUTS

What changes every run. What should the AI act upon.

EXAMPLES

A brief to execute, a data export to analyze, a transcript to turn into an asset

▼ *produces*

OUTPUTS
What the workflow produces

Analyses, dashboards, briefs, decks, and assets the team delivers.

Account Expansion and Retention: Today vs. Reimagined

TODAY

manual, ad hoc, whoever remembers

- Someone remembers to check the account list
- Reviews accounts one at a time, when there's time
- Sends the same renewal email to everyone
- Catches an expansion opportunity if they happen to notice

No signal, gate, or governance.

REIMAGINED

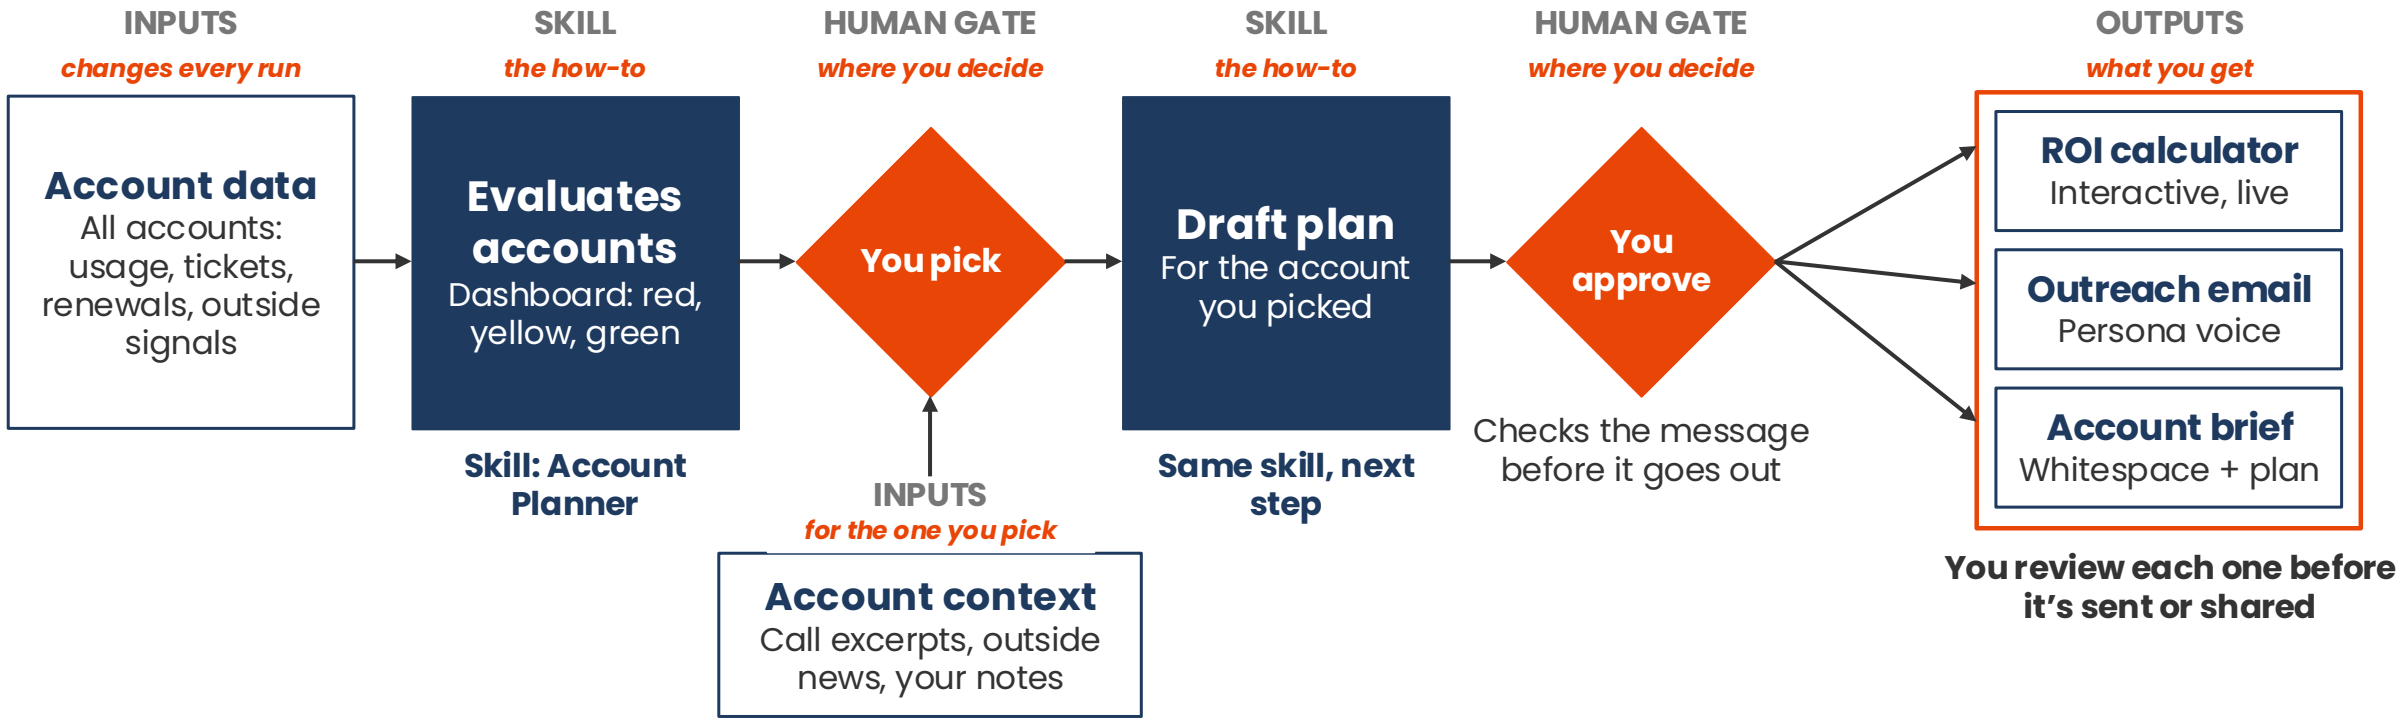

one skill, two gates, built once

- **AI** — **Evaluates every account**
- **you** — **Picks the account**
- **AI** — **Drafts the plan**
- **you** — **Approves, or redirects**

Outputs, in parallel: ROI calculator, outreach email, account brief, each reviewed before it ships.

Reimagined Human+AI Workflow: Expansion & Retention

Account signals in, three assets out, three human checkpoints.

CONTEXT *set up once, needed every time*

Persona slices + products
Matched to the account contact

Brand voice + look
Tone and visual rules

Retention Playbook
PMM and brand govern the rules

Norcastle Engineering

Stabilize | At-risk | Healthy, 84

$186,000	Mar 15, 2027	410	Mid-market
Annual contract value [data]	Renewal, 169 days from Sep 27, 2026 [data]	Active travelers [data]	Segment, engineering and construction consulting [data]

Data versus context

What the data says

- Health 84, Healthy. Usage stable or growing on all three products. [data]
- Champion is engaged and asks for benchmark data. [data]
- Asked about unused ticket recovery at the last business review. [data]
- Procurement review mentioned informally. [data]
- Estimated expansion value $74,000, potential High. [data]

What the news says (press release, Aug 18, 2026)

- Norcastle will acquire Lumen Ridge Instruments, about 450 employees, most technical staff travel. [news]
- Close expected Q1 2027. Single operating model and shared systems by the end of 2027. [news]
- Corporate Controller Elena Vasquez leads integration finance and shared services. [news]
- Savings expected from combining back-office functions and systems. Amount not disclosed. [news]
- No call excerpts or notes were supplied for this run.

The two readings disagree. Data reads Expand; the news reopens the whole program. The class follows the news: Stabilize, then protect first.

Whitespace map

AcmePortal	AcmeProduct2	AcmeProduct3	AcmeProduct4	AcmeProduct5	AcmeProduct6	AcmeProduct7	AcmeProduct8
82 engagement	Whitespace, mapped, rank 2	78 engagement	Whitespace, mapped, rank 1	Not in use	85 engagement	Not in use	Not in use

■ Owned, engagement score [data] □ Whitespace mapped to Travel Manager ▢ Not in use

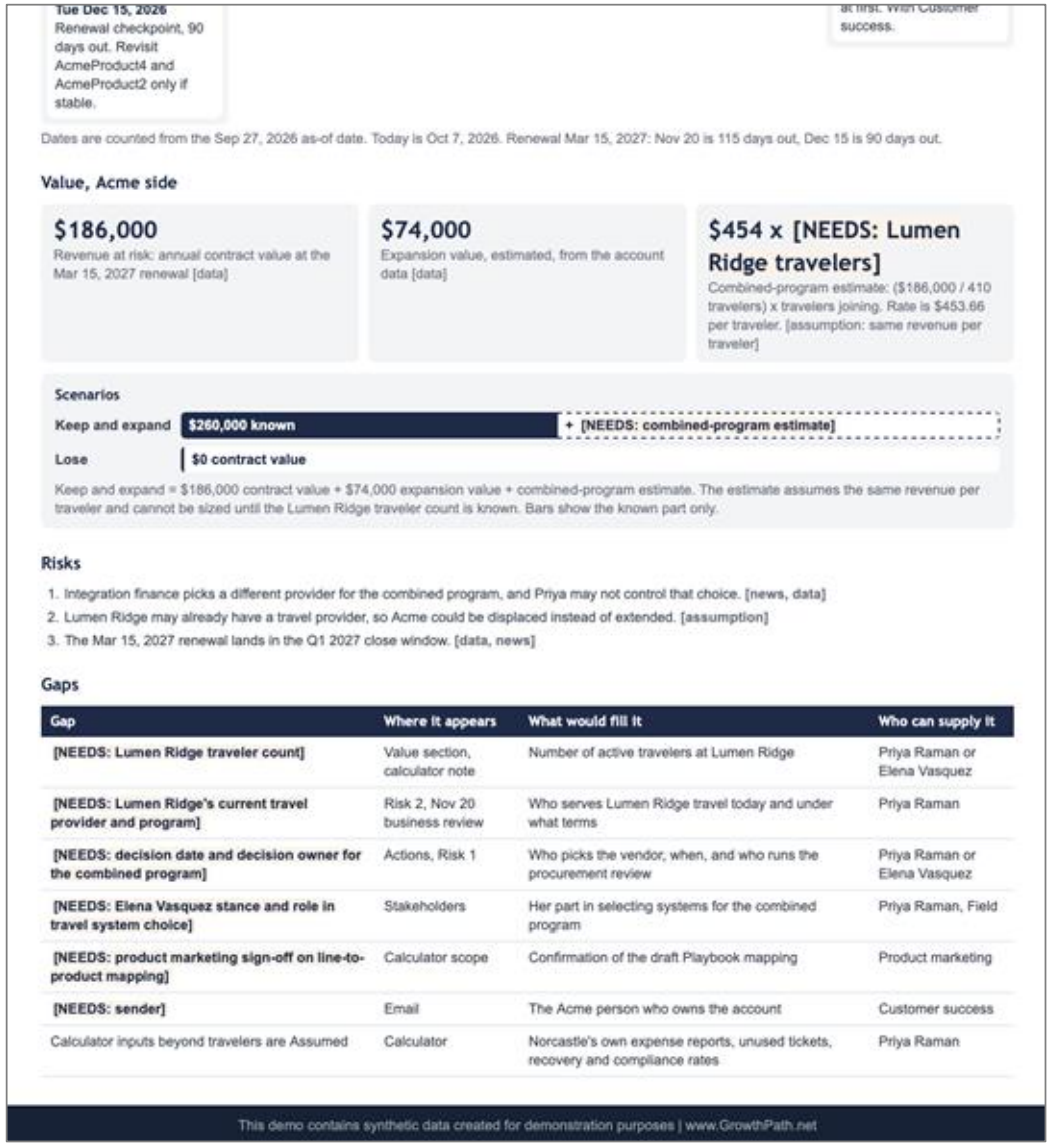

AcmeProduct4 ranks first: mapped to the persona, Priya asked about unused ticket recovery [data], and a proof point is on file. AcmeProduct2 ranks second: mapped, no stated pain, no proof point on file. Expansion waits until the account is stable.

Stakeholders

Person	Role	Persona slice	What they need	Stance
Priya Raman [data]	Director of Corporate Travel, champion	Travel Manager	Practical help and proof she can take to leadership. Simplify, streamline, balance.	Engaged, asks for benchmark data [data]
Elena Vasquez [news]	Corporate Controller, leads integration finance and shared services	Finance Manager	Numbers first, no system change mid-close. Savings, accuracy, visibility.	**[NEEDS: stance and role in travel system choice]**

Actions by owner

Customer success	Digital	Product marketing	Demand gen	Field
Fri Oct 9, 2026 Root-cause review with	**Wed Oct 14, 2026** Build calculator, email,	**Fri Oct 16, 2026** Confirm calculator line-	**Wed Oct 21, 2026** Send email and	**Fri Oct 23, 2026** Ask Priya to introduce

Tue Dec 15, 2026
Renewal checkpoint, 90 days out. Revisit AcmeProduct4 and AcmeProduct2 only if stable.

success.

Dates are counted from the Sep 27, 2026 as-of date. Today is Oct 7, 2026. Renewal Mar 15, 2027: Nov 20 is 115 days out, Dec 15 is 90 days out.

Value, Acme side

$186,000	$74,000	$454 x [NEEDS: Lumen Ridge travelers]
Revenue at risk: annual contract value at the Mar 15, 2027 renewal [data]	Expansion value, estimated, from the account data [data]	Combined-program estimate: ($186,000 / 410 travelers) x travelers joining. Rate is $453.66 per traveler. [assumption: same revenue per traveler]

Scenarios

Keep and expand: **$260,000 known** + **[NEEDS: combined-program estimate]**

Lose: **$0 contract value**

Keep and expand = $186,000 contract value + $74,000 expansion value + combined-program estimate. The estimate assumes the same revenue per traveler and cannot be sized until the Lumen Ridge traveler count is known. Bars show the known part only.

Risks

1. Integration finance picks a different provider for the combined program, and Priya may not control that choice. [news, data]
2. Lumen Ridge may already have a travel provider, so Acme could be displaced instead of extended. [assumption]
3. The Mar 15, 2027 renewal lands in the Q1 2027 close window. [data, news]

Gaps

Gap	Where it appears	What would fill it	Who can supply it
[NEEDS: Lumen Ridge traveler count]	Value section, calculator note	Number of active travelers at Lumen Ridge	Priya Raman or Elena Vasquez
[NEEDS: Lumen Ridge's current travel provider and program]	Risk 2, Nov 20 business review	Who serves Lumen Ridge travel today and under what terms	Priya Raman
[NEEDS: decision date and decision owner for the combined program]	Actions, Risk 1	Who picks the vendor, when, and who runs the procurement review	Priya Raman or Elena Vasquez
[NEEDS: Elena Vasquez stance and role in travel system choice]	Stakeholders	Her part in selecting systems for the combined program	Priya Raman, Field
[NEEDS: product marketing sign-off on line-to-product mapping]	Calculator scope	Confirmation of the draft Playbook mapping	Product marketing
[NEEDS: sender]	Email	The Acme person who owns the account	Customer success
Calculator inputs beyond travelers are Assumed	Calculator	Norcastle's own expense reports, unused tickets, recovery and compliance rates	Priya Raman

Set project instructions
Provide Claude with relevant instructions and information for chats within Acme Account Planner. This will work alongside your profile instructions and the selected style in a chat.
Acme Account Planner: project instructions
This is a demo. All data is synthetic Acme Company data.
What you do
Help the user decide where to act across a portfolio of Acme accounts, then build what they need for the one they choose. Run the acme-account-planner skill and follow its order: score every account, let the user pick, plan, get approval, build three assets, get review.
What the user brings
The customer workbook, at the start. After the pick, they may add call excerpts, news, or notes for that account only. Use what you can already see before asking for anything.
How you talk
Friendly, plain, brief. One or two sentences. No preamble, no recap.
Before a long step, give a one-line status, such as "Scoring 10 accounts."

Two Ways to Build From Scratch

1 Do it, then capture it

Work through the task in chat. When the output is right, ask Claude to turn it into a skill and instructions.

TRY THIS PROMPT

"Turn what we just did into a skill and instructions I can reuse. List suggested context and input files. Give me reasons for your suggestions."

Best when you know the work well and can tell good output from bad.

2 Get interviewed

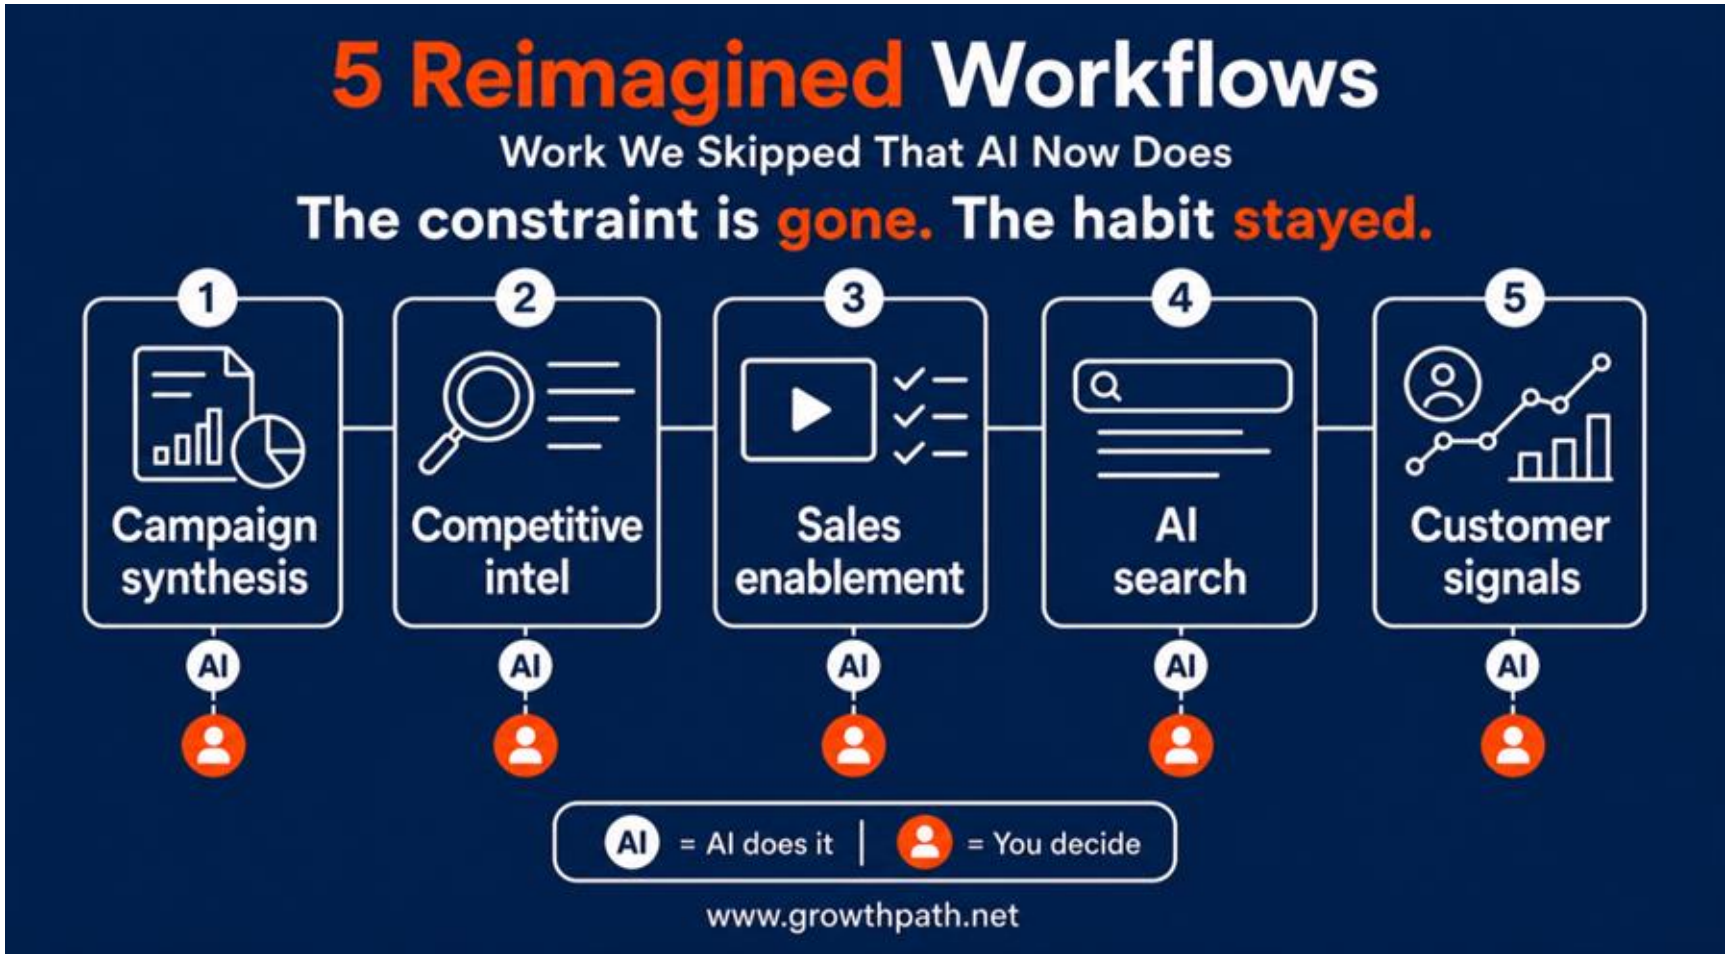

Ask Claude to interview you about the workflow. It drafts the skill and instructions from your answers.

TRY THIS PROMPT

"Interview me, one question at a time, about [workflow]. Then draft the skill and instructions. Also list suggested context and input files. Give me reasons for your suggestions."

Best when the process is in your head, or it's new to you.

Either way, you review what Claude builds before you trust it.
