THE PLAYBOOK FOR MARKETING TRANSFORMATION

CLAIRE POTTER-SCHNEIDER

Head of Marketing AI Transformation

Dynatrace

Motorola Marketing: first 6 months...

$750,000 in cost savings

12,000+ hours saved

$1.5 million in pipeline

- Member of SmarterX's AI Council
- Previously led AI Transformation at Motorola
- Google white labeled my Gemini adoption framework

Claire Potter-Schneider

Head of Marketing AI Transformation, Dynatrace

Head of Marketing AI Transformation

Objective: Changes how marketing works by building AI into our processes.

Strategy: Sets the AI vision and roadmap for marketing and ties it to business priorities.

Workflows: Redesigns how work gets done.

Enablement: Builds team skills, confidence and habits through enablement.

Impact: Tracks adoption and business outcomes.

Culture: Build a culture of exploration, experimentation, and innovation.

Agenda

01 **Governance**
Build the foundation

02 **Enablement**
Establish the culture

03 **The 3 A’s**
Apply the framework

04 **Role Redesign**
Reimagine the work

01

Governance

Build the foundation

AI Without Ownership

No Governance

Shadow AI

Inconsistent outputs

Duplicated efforts

AI ‘Slop’

Result

Wayward experimentation

Difficult to scale

Poor business outcomes

Risk Accumulating

Principles in Practice

Gates

Burden on employees to seek permission

Access: Approvals outside of your org

Use Case: Committee approves every use case

Accountability: No point of contact

Policies: Undefined or too broad

Communication: Owned by IT

Guardrails

Burden on leadership to define policies so permission isn't required

Access: Internal approvers

Use Case: Approvals depend on scale of use case

Accountability: One point of contact

Policies: Documented with use cases

Communication: Functional owner

Marketing Council Responsibilities

Council Chair

Owns
High-risk use case escalation
Org-wide tools
Enablement
Roadmap

Delegates
Everyday use cases

Council Members

Owns
Elevating impactful use cases
Functional best practices

Delegates
Security/IT questions (IT)

Approvals Scale with Risk

	Tier 1	Tier 2	Tier 3
What	Internal-facing use case	External-facing use case	Customer data or autonomous action
Approval	None needed	Marketing Council	Corporate Council + Legal/IT

Prioritization Model

01 | What is this?

Function - Use case - Visibility

02 | Why does this matter?

Benefit - Accountability - Overlap

03 | Is this feasible?

Concern details - Dependencies (tech and team)

04 | Weighted Scoring

Cost

Concern score (high, medium, low)

Level of effort (high, medium, low)

Level of impact (high, medium, low)

Timeframe

AI KPIs

Adoption	Organizational Impact	Business Impact
Active users	Workflow integration #s	Pipeline
# of impactful use cases	Time to market	Conversion
Proficiency	Campaign velocity	Cost per lead

The Result

Changed	Established	Delivered
Removed gates	Governance framework	Prioritized use cases
Defined guardrails	Risk tiers	Documented phase 1 of AI transformation
	KPIs	

Governance isn’t a section of the transformation.

It’s the foundation.

02

Enablement

Establish the culture

Phase 1: Assess

01

Benchmarking Survey

02

Functional Interviews

03

Current Use Case Reviews

04

Maturity Model

05

State of AI Report

06

Set Goals

You can’t change behavior you haven’t measured.

Phase 2: Communicate

01

Communicate Priorities

02

Share Governance Guardrails

03

Build Resource Hub

04

Connect with Leadership

05

ID Comms Channels

Start building your culture.

Phase 3: Educate

01

Use Case Examples

02

Demos

03

Office Hours

04

Day in the Life Sessions

05

Functional Sessions

Create opportunities to learn.

Phase 4: Activate

01

Share Success Stories

02

Hackathon

03

Rewards & Recognition

04

Full-Day Training Session

Teams don’t adopt tools. They adopt workflows they’ve seen in action.

The Enablement Blueprint

Motorola Case Study: Gemini Quest

A 5-level gamified challenge series, judged by the Marketing Council.

Foundation

Teams had a format for how to learn AI that was applied to other AI tools.

Hand Raisers

Identified 6 champions for us.

Impact

60% adoption increase in 90 days

2 years out, Marketing was still the leader in AI use for the entire company.

03

The 3 A’s

Apply the framework

3 A’s Introduction

01 Augmentation

Improve human execution of the task

02 Acceleration

Compress the timeline

03 Automation

Remove the task

Motorola Case Study: Content Creation

Augmentation

Mapped out content generation

Access to Jasper

Data-driven approach

Acceleration

Removed barriers

Faster generation

Leadership buy-in

Automation

Review agents

Derivative short-form content

Motorola Result: First 6 Months

$750,000 in cost savings

12,000+ hours saved

$1.5 million in pipeline

04

Role Redesign

Reimagine the work

Building Your Audit

01 | Who

PMM
Campaigns
Brand
MOPS
Etc.

02 | What

Landing pages
Blogs
White papers
Sales enablement
Product guides
Etc.

03 | How

Preparation
Writing
Design
Localization
Sign-off/Publishing
Maintenance

04 | The Math

Assets/month x Hours/asset/stage = Hours/month

>8,500 hours per month on content creation

In Practice

Department (s)	Capabilities	Preparation (Planning, Reqs, Research, Outline)			Writing Content			Design / layout / formatting			Regionalisation / translation			Sign off and Publish			
	Content Type	Quantity (Avg# /month)	Time (hours /item)	Total hours /month	Quantity (Avg# /month)	Time (hours /item)	Total hours /month	Quantity (Avg# /month)	Time (hours /item)	Total hours /month	Quantity (Avg# /month)	Time (hours /item)	Total hours /month	Quantity (Avg# /month)	Time (hours /item)	Total hours	Grand total hours /month
INTL Campaigns	Landing Page copywriting																
NA Media	eDM copy writing																
Product Marketing	Blog copywriting																
NA Gov Field Marketing	Pitch Deck / Guide																
NA Digital Campaigns Gov	Infographics																

Impact Assessment

Inputs
Complete MarTech stack audit Recent ‘State of AI’ reports (SmarterX, Accenture, Gartner, McKinsey…) Your org’s job descriptions Governance materials Your prompt

Campaign Manager

Task	Future state	Projected Time Savings	Next Steps
Campaign strategy	AI drafts the plan from goals, ICP and past results; humans make the strategic call.	30-40%	Claude project with a brief template, grounded in past campaign data. Perplexity for benchmarks.

05

Wrapping Up

What You Built Today

Governance Policies

Defined accountability

Approved guardrails

Removed gates

Risk tiers

Prioritization Model

What is this?

Why does it matter?

Is it feasible?

Weighted scoring

Enablement Blueprint

Assess

Communicate

Educate

Activate

The Audit Template

Defined scope

Documented steps

Measured time spent

Resources needed

Impact Assessment

Role definition

Task inventory

3 A's

AI application

Don’t build an AI transformation pilot.

Build an AI transformation program.

Thank you
